

HSM HL 4812

WxDxH : 5158 X 1642 X 2550

Optional engine power 15kW or 22kW

Very low space requirement · Compresses cardboard and foils · Especially large loading aperture for bulky materials · Suitable for continuous loading (e.g. via conveyor belt) · Hydraulic counterplate for bale removal ensures optimum operating convenience and safety · High specific pressing power provides a high compaction of the material and consequently an optimum HGV load · Intuitive, multilingual operational guidance via graphic description · Pallet locking mechanism for safe bale removal · High process reliability .

Pressing Power : 48.000 kg

Bale size (W x D x L) : 1100 × 750 × 1200 mm

Weight Bale up to 420 kg, Max.

Press weight : 7000-7500 kg
