

## PURITY C1000 AC

A Special filter used for cold drinks in areas where the water is very soft. The water filter removes chlorine, heavy metals and small particles and water. Filter 10 000 L. Sits this steamed cold drinks, steamed coffee and areas where water is very soft and for the preparation of drinking water in the kitchen, because with its carbon block refining water,

while in water it leaves minerals that are good for the humane Organism.

Trusted BRITA Systematic Filtration Technology optimises water in two steps:

### **1 Pre-filtration**

A pre-filter retains coarse particles.

### **2 Activated carbon filtration**

All water runs through an activated carbon filter to reduce taste and aroma impairing substances. Very fine pores ensure excellently

retention of particles.

### **IntelliBypass technology**

The unique IntelliBypass technology allows for a constant by-pass water rate irrespective of the volumetric flow. This ensures consistently

high water quality, particularly in case of low water throughput rates.

- **It doesn't remove a water stone from the water!**
